- More bike storage areas, enabling up to three bikes to be carried
- At least one accessible toilet on every train
- Clear luggage racks to minimise forgotten bags
- Improved digital information screen
- Plug and USB sockets at every seat
- Intelligent air conditioning which reacts to the carriage environment
- Free WiFi

## Background

The Class 196 fleet will replace West Midlands Railway's 20-year-old Class 170s. It is the first new fleet to be introduced under this franchise for more than a decade. The majority of the trains in the fleet were built in the UK, at CAF's factory in south Wales. The trains are part of a £690m investment by West Midlands Trains in new trains and infrastructure and will increase capacity by 25% compared to the fleet being replaced.
